

BC Update 191: New guidance says well-planned ground investigations can save costs

Posted: 6 July 2016

A new practice advisory explains the need for early site investigation, as a key element in controlling the costs of a project and delivering good building performance.

The advisory describes the aims of site investigation, investment considerations and the site investigation strategy – including extent, depth and inherent uncertainties.

Practice Advisory 17: Well-planned ground investigations can save costs (<https://www.building.govt.nz/building-code-compliance/b-stability/b1-structure/practice-advisory-17/>)
