

Online courses on managing buildings in an emergency

Posted: 18 October 2018

Building Controls Update 240

Two courses on rapid building assessment are now freely available on the Ministry of Business, Innovation and Employment's online learning website.

The courses, which support management of buildings in an emergency, are for:

- Chartered professional engineers (structural and geotechnical), senior building officials and senior architects registered by MBIE as tier 2 assessors following the required face-to-face training. Both courses provide refresher training for this audience.
- Chartered professional engineers (structural and geotechnical), building officials, senior architects and emergency support staff seeking self-directed awareness training who may be interested in becoming tier 3 assessors.

To find out more about MBIE's three-tiered capability system for managing buildings in an emergency, read section 2 of [Managing buildings in an emergency \(https://www.building.govt.nz/managing-buildings/post-emergency-building-assessment/guidance-decision-makers-territorial-authorities/\)](https://www.building.govt.nz/managing-buildings/post-emergency-building-assessment/guidance-decision-makers-territorial-authorities/).

Introduction to rapid building assessment

This course is about the rapid building assessment process and the role of the assessor. It takes about 30 minutes to complete.

Rapid building assessors in the field

This course looks at how to assess buildings and what it's like working as part of the assessment team. It takes about 40 minutes to complete.

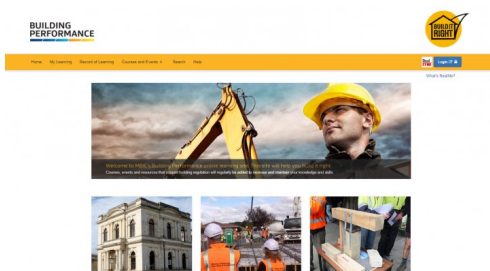

Learners can have a go at assessing buildings and hear from assessors about their experiences when in the field.

Anyone involved in managing buildings in an emergency will find these courses useful.

How to login

You will need to log in using your Real Me account and you will need to register your details the first time you do a course.

If you don't have a Real Me username and password, select Login and choose to create one.
