

Recognition Notice

RN-10034: Water Heaters and Hot-Water Storage Tanks

This is an unofficial consolidated version of the Building (Product Recognition WaterMark Water Heaters and Hot-Water Storage Tanks) Notice 2026: RN-10034 and amendments incorporated as at 28 September 2026.

This consolidated version is intended to provide up- to-date details of the building products or building methods the notice currently recognises.

Official versions of the initial notice and subsequent amendments can be found at:

<https://www.building.govt.nz/building-code-compliance/product-assurance-and-certification-schemes/overseas-products-and-standards/approved-products-certified-overseas/recognition-notice#jumpto-current-recognition-notice>

The Building (Product Recognition WaterMark Water Heaters and Hot-Water Storage Tanks) Notice 2026: RN-10034 came into effect on 9 February 2026.

This notice has been amended by the following Building (Product Recognition WaterMark Water Heaters and Hot-Water Storage Tanks) Amendment Notices:

Amendment notice	Commencement date	Amendment details
Building (Product Recognition WaterMark Water Heaters and Hot-Water Storage Tanks) Amendment Notice 2026: RN-10034	28 September 2026	Schedule 1, table updated to: a) revoke product certificates for rows 32, 66 and 70. b) change expiry dates for rows 16, 28, 31, 54, 71 and 72. c) delete additional conditions and limitations at row 54. d) add " Not all scheduled products are lead-free." at row 141. e) add "Global-Mark Pty Ltd GM-WM040043-I04-R10 08/08/2029" at row 147.

Building (Product Recognition WaterMark Water Heaters and Hot-Water Storage Tanks) Notice 2026: RN-10034

This notice is made under section 272HA of the Building Act 2004 by Simon Thomas, Head of Building System Delivery and Assurance at the Ministry of Business, Innovation and Employment (MBIE), under the delegated authority of MBIE's Chief Executive.

This notice recognises building products specified in the product certificates in Schedule 1 of this notice, which are certified under the WaterMark certification scheme in Australia.

Building (Product Recognition WaterMark Water Heaters and Hot-Water Storage Tanks) Notice 2026: RN-10034

1 Title

This is the Building (Product Recognition WaterMark Water Heaters and Hot-Water Storage Tanks) Notice 2026: RN-10034.

2 Commencement

This notice comes into force on 9 February 2026.

3 Interpretation

In this notice of recognition, unless the context otherwise requires,—

Act means the Building Act 2004

Building Code means the New Zealand Building Code, which is Schedule 1 of the Building Regulations 1992, made under section 400 of the Act.

Certified intended use means the intended use of the building product certified by the certification body and as described in either the product certificate, building product's manual, or other relevant materials.

Conformity assessment body (CAB) means an organisation that certifies activities to demonstrate that a product, process, system, person, or body meets specified requirements for the WaterMark certification scheme.

Product type means a plumbing or drainage product that presents a public risk requiring mitigation, as determined by the Protocol for the Assessment of Risks of Plumbing Product under the WaterMark scheme. It is regulated under the Plumbing Code of Australia and listed in the WaterMark Schedule of Products.

4 Recognition of the following certified WaterMark products

Under section 272HA of the Act, I recognise the building products certified under the overseas product certification scheme, WaterMark, that are included in the product certificates listed in Schedule 1 of this notice.

5 Certified intended use of building product

The certified intended use of the product types listed in Schedule 1 of this notice are the product scope/applications of the product type categories under the WaterMark certification scheme, known as the WaterMark Schedule of Products – Systems and Heated water products.

Modular heated water systems: Modular heated water systems for the generation of heated water which may incorporate hot, cold and tempered water systems, water heaters and heated and cold-water storage tanks.

Instantaneous (continuous flow) water heaters: Electric resistance.

Instantaneous (continuous flow) water heaters: Gas, such as liquefied petroleum gas (LPG) and natural gas (NG).

Storage water heaters: Electric resistance (direct and indirect).

Storage water heaters: Gas, such as liquefied petroleum gas (LPG) and natural gas (NG).

Solar water heating systems: N/A.

Heat exchange water heaters: N/A.

Calorifiers: N/A.

Heated water and pre-heat storage: N/A.

Boiling water dispensers: Boiling water dispensers and appliances dispensing hot water at near boiling temperature. Noting that integral components are to be assessed to their applicable specification.

Geothermal energy heat pump systems for home air conditioning and supplementary potable water heaters: Geothermal system for air conditioning and storing energy in the water contained in a storage tank. During the cooling period, heat extracted from the ambient by the system is stored in water, and the heat transfer is facilitated by a stainless-steel heat exchanger. The water is stored in an electric storage water heater. When the temperature in the tank gets to 600C, heat transfer from the refrigerant to the waterside is stopped by deenergizing a pump that transfers water from the storage tank to the heat exchanger and back to the storage tank. Water Mark Certification is only for components covered under the Plumbing Code of Australia (PCA). WaterMark Certification shall not be used to cover off on components that may lie outside the PCA scope, such as refrigeration equipment.

6 Conditions and limitations of this notice

The conditions and limitations of this recognition notice are set out in Schedule 1.

Building Act 2004, section 272HA

Schedule 1

List of WaterMark certificates with recognised building products

Standard	Standard title	AS/NZS 3500 series link	Equivalent acceptable solution or verification method	Building Code performance clauses
AS 3498:2020	Safety and public health requirements for plumbing products – Water heaters	AS/NZS 3500.1, AS/NZS 3500.4	B2/AS1, G12/AS1, G12/AS3	B2.3.1(b), F2.3.1, G12.3.2(c), G12.3.8 (a) and (b), G12.3.9

	and hot-water storage tanks			
Conditions and limitations of recognition				
The building products recognised by this notice must be installed according to the conditions and limitations specified in the product certificate for the relevant building product, as set out in Schedule 1 of this notice. Where applicable all copper alloy products to be used in contact with drinking water certified under this standard will need to meet the lead-free requirements, as outlined in G12/AS1, from 1 May 2026. To be compliant the submitter must provide a valid lead-free test certificate from an IANZ-accredited body or equivalent to NSF/ANSI/CAN 372:2020. This must be provided with the building consent application for it to be accepted as establishing compliance with the Building Code. So long as the user complies with the requirements in the product certificate (if any), the standard it is certified against (if any), and the relevant technical installation information from the manufacturer, the building products listed comply with the relevant clauses listed in this table. The <i>Additional conditions and limitations</i> in this schedule are additional requirements imposed by the Ministry of Business, Innovation and Employment. The certified intended uses of the building products in this table are laid out in the WaterMark Schedule of Products – Systems and Heated water products, listed in clause 5 of this notice.				
Certificates recognised as meeting AS 3498:2020
