Introduction

This module provides a specification for designing and constructing ground improvement. It is specifically directed at ground improvement for liquefaction mitigation in single residential properties in Canterbury. However, it will also be useful for other areas of New Zealand prone to liquefaction.

Contents

The module covers four of the main ground improvement techniques. This is part of the Earthquake Geotechnical Engineering Practice series.

Appendices

Module 5A: Appendices 3, 4 and 5 (<https://www.building.govt.nz/building-code-compliance/b-stability/b1-structure/module-5a-ground-improvement-canterbury/module-5a-appendices/>)

Education

Learn about Module 5A (<https://www.building.govt.nz/building-code-compliance/geotechnical-education/module-5a/>) in the geotechnical education section.
