

D2 Mechanical installations for access

Safety provisions for people using or servicing mechanical installations in buildings, such as lifts or escalators.

This clause ensures people's safety while they are using or undertaking maintenance on mechanical installations for movement, such as lifts, escalators, and passenger conveyors.

It requires mechanical installations for movement to:

- withstand loads required for normal use
- be built to avoid accidents and injury
- safeguard people in the event of overload or emergency.

Record of amendments (<https://www.building.govt.nz/building-code-compliance/how-the-building-code-works/different-ways-to-comply/acceptable-solutions-and-verification-methods/record-of-amendments/>) is a record of changes to the Acceptable Solutions, Verification Methods and handbooks.

Updates

MBIE to consult twice yearly on changes to the Building Code System

10 AUGUST 2018

MBIE will now consult twice yearly to ensure Acceptable Solutions and Verification Methods are up to date.

Acceptable Solutions and Verification Methods

Current version

Previous versions

These are issued by MBIE to provide one way of complying with the Building Code and must be accepted by BCAs as demonstrating compliance with the related clauses of the Building Code. Using them is not mandatory.

2nd edition, amendment 7

Acceptable Solutions and Verification Methods

(<https://www.building.govt.nz/building-code-compliance/how-the-building-code-works/different-ways-to-comply/acceptable-solutions-and-verification-methods/>) (AS and VMs) were called compliance documents. Some still have the “compliance document” title but the AS or VMs they contain are valid and unaffected by the name change.

Version history (<https://www.building.govt.nz/building-code-compliance/d-access/d2-mechanical-installations-for-access/acceptable-solutions-and-verification-methods/>)

Guidance

These documents are provided for assistance. They are not intended as a means of establishing compliance with the Building Act or Building Code, and they do not have the same status accorded to Acceptable Solutions and Verification Methods under the Act.

(<https://www.building.govt.nz/building-code-compliance/d-access/accessible-buildings/pedestrian-circulation/>)

3. Pedestrian circulation: Designing buildings for access and usability

All building users are pedestrians at some point and need a well-designed, constructed and maintained external pedestrian environment.

(<https://www.building.govt.nz/building-code-compliance/d-access/accessible-buildings/fixtures-and-fittings/>)

8. Fixtures and fittings: Designing buildings for access and usability

Design and place fixtures and fittings such as seating, switches, controls and sanitary fittings in toilets so that they are easily accessed and used.
