About this document

Published on 1 May 2011

Of interest to Building consent authorities, Registered architect, Builders, Designers, Engineers

ISBN: ISBN: 978-0-478-34387-8 (Print) / ISBN: 978-0-478-34388-5 (Online)

Introduction

This guide provides assistance for building designers undertaking the design of weathertightness remediation solutions. It focuses on design aspects particular to weathertightness remediation rather than the usual design process.

It is primarily targeted at designers who are either already undertaking this type of design work or, are considering taking it up. BCAs, builders and homeowners may also find the information useful.

This publication was jointly produced with BRANZ. It was developed with extensive input from practitioners and other experts from the building sector. It may be updated from time to time.
