Acceptable Solutions and Verification Methods (<https://www.building.govt.nz/building-code-compliance/how-the-building-code-works/different-ways-to-comply/acceptable-solutions-and-verification-methods/>) (AS and VMs) were called compliance documents. Some still have the “compliance document” title but the AS or VMs they contain are valid and unaffected by the name change.

All of the Acceptable Solutions and Verification Methods relating to G7 are contained in one document.

- G7/VM1 verifies that illuminance can be assessed using one of the BRE calculation methods in NZS 6703.
- G7/AS1 provides design solutions to show appropriate vertical windows in external walls, and their height. Its Tables show acceptable and approximate reflectance for surface finishes. It describes a means of showing compliance with ‘awareness of the outside environment’.

Cited content in this document (<https://codehub.building.govt.nz/resources/1541/#!#resource-citations>) can be found on the Building CodeHub website.

## 1st edition, amendment 1

Effective from 1 December 1995 until 14 August 2014

### 1st edition, amendment 1
