

## Learn about Module 5A

---

Last updated: 3 May 2018

This guideline provides a specification for designing and constructing ground improvement. It focuses on ground improvement to mitigate liquefaction effects on single-storey residential properties.

## Module 5A guideline

---

Module 5A: Specification of ground improvement for residential properties in the Canterbury region (<https://www.building.govt.nz/b1-structure/geotechnical-guidance-3/>), and other modules, are available in the earthquake geotechnical engineering practice series.

## Module 5A educational resources

---

### Video: How to specify ground improvements for properties prone to liquefaction

Guidance to help geotechnical professionals prepare documentation that will make tendering and consenting easier.
