

Case studies for your product's Building Code compliance

If you are trying to prove your product or system is Building Code compliant, these case studies may help you.

The following case studies and examples illustrate how product assurance can work in a New Zealand context.

We have written these after meetings with manufacturers, suppliers and others building industry players. They will be added to and updated from time to time.

In this section

Case study one

Example: a range of back flow valves.
