

Simple house - REVOKED

The Simple House Acceptable Solution is for single storey framed construction using limited roof spans and claddings.

SH/AS1 has been revoked and is no longer a deemed-to-comply solution.

Content from SH/AS1 could be used as part of an Alternative Solution.

MBIE consulted on revoking SH/AS1 in early 2019 due to its low uptake. Submitters noted that some unique content within the solution was applicable to other residential buildings so after a thorough review of this content, we transferred relevant material to B1/AS1.

Acceptable Solutions and Verification Methods

Current version

Acceptable Solutions and Verification Methods (<https://www.building.govt.nz/building-code-compliance/how-the-building-code-works/different-ways-to-comply/acceptable-solutions-and-verification-methods/>) (AS and VMs) were called compliance documents. Some still have the “compliance document” title but the AS or VMs they contain are valid and unaffected by the name change.
